5th November 2022

Message

I am very glad to know the Indo-Uzbek Meet & International Conference on Trends and Innovations in Food Technology, being organized by the Integral University, Lucknow, India jointly with Tashkent Chemical Technological Institute, Tashkent, Uzbekistan. The scientific theme of the conference on Serving Present to secure Future is of great relevance, given the alarming situation on climate change and sustainability.

I understand that the conference will cover the domains of food researchers, industrialists, nutritionalist, young scientists, food safety officers, and students from the fields of food technology, biotechnology and allied areas. I hope that the presentations made by the noted key experts will be of immense benefit all the delegates attending the conference and offer them unique opportunity to interact as well make them aware with the new developments in related areas. I hope that the present conference would do its endeavor for the benefit of its participants and deliver a positive impact on the delegates.

I would like to thank Dr A Farooqui, Convener, TIFT-2022 and her team for their efforts in shaping up this event and for its success.

My best wishes to all associated with the conference.

Sincerely,
Ashok Pandey
