I am happy to learn that Integral University, Lucknow in collaboration with Tashkent Chemical-Technological Institute, Uzbekistan is organizing an **INDO-UZBEK Meet & International Conference on Trends & Innovations in Food Technology: From Farm to Fork** (TIFT-2022) on 24-25 November 2022 with concept theme “Serving Present to secure the Future”.

Recent advances and latest innovations in food science and technology have already indicated a positive leap towards sustainable food options with procurement and development of regional foods, alternative sources of proteins, nutraceuticals and individualized nutrition. Even the food technology startups and brands have started focusing more on incorporating waste reduction techniques as well as zero-waste workflows concerning the environment. Moreover, the world is on the verge of exploring Industry 4.0 technology across the entire food value chain in order to raise food quality, its availability and sustainability.

The present conference will surely provide the right and timely platform for the exchange of novel ideas and thoughts catering the food sustainability and availability issues. I wish the conference a grand success and hope that all the participants will reap out the maximum through it and significantly apply in their area of knowledge for the better future.

(Narendra Pratap Singh)

Vice-Chancellor
