**MESSAGE**

I am pleased to note that an **INDO-UZBEK Meet & International Conference on Trends & Innovations in Food Technology: From Farm to Fork (TIFT-2022)** is being organized by Integral University, Lucknow in collaboration with Tashkent Chemical-Technological Institute, Uzbekistan on 24-25 November, 2022.

Developments and innovations in technologies related to food processing, handling, management and processing are seen as one of the most accessed solutions to the problems of food and agriculture around globe. It promises to reduce the use of pesticides, improve crop yield, food processing and promote new edible & fortified products. The desire for the propagation and communication of this technology at ground level has always been a key point for any success story. I am confident enough to state that the organization of this conference is certainly going to serve as a starting point for a more in-depth dialogue among researchers, consumers, business persons and academicians about the near-and long-term uses and safeguards in food science and technology.

I extend warm greetings and felicitations to the organizers of this event and wish them all the success in their endeavor. I also wish to convey my hearty congratulations to all the members of the Integral University, Lucknow and Tashkent Chemical-Technological Institute, Uzbekistan for the organization and deliberations of this important Conference.

( Nazir Ahmad Ganai )
